The Building:
The New York Times is among the largest Newspapers in the world. It has accumulated a collection of historical photographs and their related articles unrivaled by anyone. The World Class collections date back from the early 20th Century consisting of a mix of paper, acetate negatives, and now, the modern polyesters and electronic media of tapes, microfilms, and compact disks.

Nature of Firm’s Responsibilities:
Landmark Facilities Group, Inc. has been retained as experts in the development and design of facilities to produce precision preservation environments for the archival collection. Their role has been to determine the proper environment for the various media and ensure its practical value from an accessibility standpoint. Design guidelines have been developed for “cold” storage facilities, as well as their shelving logistics to achieve rapid access to 0°F cold compact stored material.
